Anacortes Bike Park

The following proposed design is built around 3 questions:

1. What features do local riders want to be able to ride without travelling to do so?
2. What features would help new riders transition from a paved path to the ACFL trails?
3. What features would make it easier to run the Anacortes Mountain Bike Team and prepare kids for what they will encounter outside of Anacortes?

The proposal includes two successive phases.

Phase 1: Clearing, Beginner Loop with Skills Development options, Pumptrack

Phase 1

- Beginner Loop Trail with Skills Development Options
- Clearing/Gathering Area
- Pumptrack

Beginner Trail with Skills Development Options:

An entry point for beginner riders. Incorporates terrain that begins building skills for off road riding. There will be optional technical trail features along the side that provide a chance to try more challenging obstacles when ready and add some fun for more advanced riders. Examples below show similar trails and features.

Smooth compact gravel and dirt surfaced trail
24"-36" wide.

Flat corners

Bermed Corners

Dirt Rollers

Raised Wood Rollers

Rock Obstacles

Mock Roots

Wood Skinnies

Wood Drops

<p>Wall Ride</p>	
<p>Braking Box</p>	<p>(No Image Available) A slightly descending section of trail with 4 cones or posts to create a "box" to stop within. Used to teach riders to use both brakes and stop without skidding.</p>

Pumptrack

A closed loop of banked corners (berms) and rolling hills (rollers). The track is 4-6' wide with berms and rollers up to 4' tall. Pumptracks are fun for all ages and skill levels while being great for developing skill and fitness. The surface would be dirt.

Gathering Area

A smooth flat area about 50' across where the Anacortes Mountain Bike Team or other groups can gather. From there they can split into smaller groups to disperse through the park or ACFL trails. (no photo)

Phase 2:

Beginner Jump Line, Intermediate Jump line, Advanced Jump Line

Phase 2

- Beginner Jump Line
- Intermediate Jump Line
- Advanced Jump Line
